

STEM SUMMER CAMPS

Stop Motion Animation

8:30am - 10:00am (3rd-5th)

Come and learn how stop motion animation movies are created. Clay, LEGOs, and paper are a few of many materials available to build with and create amazing stop motion videos.

Intro to Robotics

10:15am - 12:15pm (3rd-5th)

This workshop incorporates robotics and STEM. Students will explore programming a variety of robots. They will gain information on motion control, motors, sensors, and programming capabilities.

Hummingbird Robotics

1:00pm - 4:00pm (4th-6th)

Bring creations to life by building with Hummingbird robotics components and coding with Scratch.

JULY 8-12, 2019
