

STEM MAKERS (Grades K-5)

WAUKEE
COMMUNITY
EDUCATION

STEM Makers allows students the opportunity to experiment with different types of materials and tools in an environment that is based on their individual interests. Students will learn robotics and programming, fuse plastics, play with OSMO's, make creations using a 3D pen, and so much more! Your child will spend the week thinking like an engineer! Students will understand and complete the engineering design process, learn how to use STEM tools safely, solve problems using different tools, and design and build a makerspace project of their choice. Students will take home their 3D creations and a choice project. Taught by Grant Ragan Elementary Teachers, Megan Trader and Jessica Hammans. *Participants must bring their own nut-free lunch!*

Saturday, February 8th

9 AM to 3 PM

Grant Ragan Elementary Media Center

Fee: \$149
